

Paguro 9000V

Powered by a LOMBARDINI FOCS engine, the Paguro 9000V is a true variable speed generator running between 2400-3000rpm. With a start load capability of 65A, the Paguro 9000V is great for starting power hungry equipment such as multiple air conditioning units, a large watermaker and more.

Peace & Quiet

Cocooned in a 4- stage soundproof capsule to keep noise to a minimum. Anti-vibration feet, both internal and external ensures that the generator runs smoothly. The result is a generator that quietly does its job whilst you relax on board.

Independence

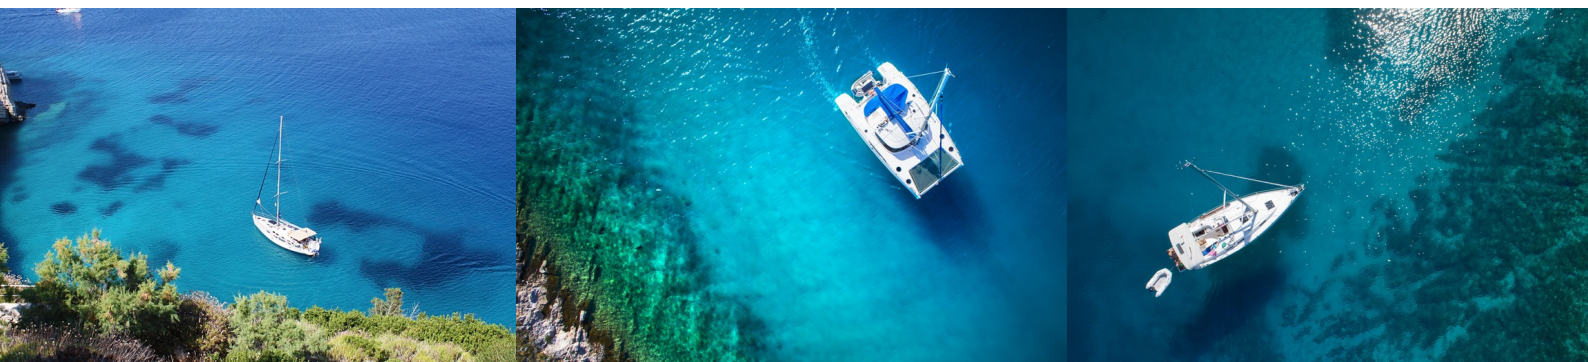

With a Paguro 9000V on board you can enjoy the full potential of your yacht. With a power supply greater than having shore power on board, you'll have the freedom to explore in comfort and safety.

Low Cost of Ownership

Designed for ease of maintenance and single side servicing, with an oil change hand pump for clean and easy oil changes. It also has the added bonus of longer service intervals than comparable generators.

Safe Hands

The Paguro 9000V is a tried and trusted design that has been in successful production for many years. The popularity of the LOMBARDINI & Paguro brands around the globe ensures that wherever you are in the world, you won't be far away from spares and servicing support.
